lunar energy | California ENERGY COMMISSION

An intro
for homeowners

Get more from your Lunar System

with Demand Side Grid Support

The DSGS program from the California Energy Commission puts your battery to work for you and your neighbors.

Between May and October, Lunar gives some of your stored clean energy to the grid when it's under strain from heatwaves or high demand – the moments California needs it most. **You earn up to $320 for the season**, your neighbors stay powered, and the grid gets a little more resilient every time.

System Capacity	Estimated Payment
Lunar 15kWh	$200
Lunar 20kWh	$260
Lunar 25kWh	$320
Lunar 30kWh	$320

Note: The current season runs from May 1st through October 31st, 2026.

The California Energy Commission (CEC) Demand Side Grid Support (DSGS) Program is part of California's Strategic Reliability Reserve, a suite of programs to alleviate tight energy supplies on the grid caused by heatwaves, wildfires, and other ongoing impacts of climate change.
