Maintain tax credit eligibility with the Lunar System

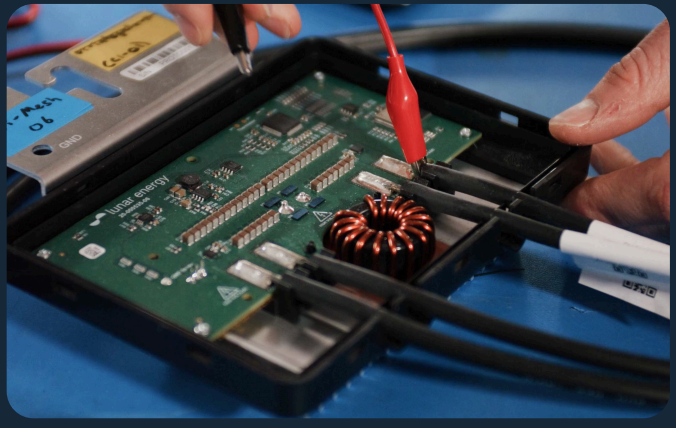

Recent changes in the US tax code mean third-party solar and battery owners need to **pay close attention to their equipment manufacturers and look at their supply chains.** Using Lunar Energy's products maintains **ITC eligibility throughout 2026 and qualifies for a 10% domestic content bonus credit.**

How?

- Lunar Energy is and has always been a U.S. company.
- It has no investment or any appointed officers from any prohibited foreign entities.
- Lunar Energy makes all its products in North America – and specifically the inverter and module level power electronics in the U.S. outside Atlanta, Georgia.
- Lunar Energy will continue to onshore manufacturing to ensure it stays qualified throughout 2027.
